## **In the Defendant's Chair** Lynn Yvonne Moon

Imagine tucking your three young children in for the night and making love to your husband by the fire only to wake in a court room several months later accused of the brutal murders of your entire family. With only her young court appointed attorney at her side, Early Sutton argues her innocence while battling for her sanity. But to her lawyer's shock, Early is not the only woman suddenly waking up across America finding themselves as the only suspect, and not one has any memory of their fateful night. In *The Defendant's Chair* delves into the frightening world of genetic splicing and the twisted plot of the elitists who plan to manipulate the human genome.

The novel examines into the moral, ethical, and medical ramifications of cross genetic splicing of the human race with other living creatures such as animals and insects. Although a few laws have been passed to stop genetic experimentations, only a few countries have actually made it a punishable offense. How would our civilization react to human crossbreeds and what rights would they have? This novel is appealing to readers interested in government conspiracies and how easily they are covered up so that no one ever suspects that the scientists were successful.
