Evidence-based Conservation: Lessons from the Lower Mekong (The Earthscan Forest Library)

Evidence-based Conservation: Lessons from the Lower Mekong (The Earthscan Forest Library)

There is a considerable gap between the science of conservation biology and the design and execution of biodiversity conservation projects in the field. Science is often failing to inform the practice of conservation, which remains largely experience-based. The main reason is the poor accessibility of evidence on the effectiveness of different interventions. This is the basis for this book adopting an 'evidence-based approach', modelled on the systematic reviews used in health sciences and now being applied to many policy arenas.

Evidence-based Conservation brings together a series of case studies, written by field practitioners, that provides the evidence-base for evaluating how effective conservation and poverty alleviation strategies can be better implemented. A series of systematic reviews uses experiences and data from fifteen integrated conservation and development projects conducted in the Lower Mekong region, specifically in Vietnam, Laos and Cambodia. They provide wide-ranging overviews of the effectiveness of protected areas and how innovative tools and methods for monitoring and evaluation can be utilised for more effective outcomes. Results are in the form of management and policy recommendations, based on the quality of evidence and the cost-utility of the intervention. By bridging the gap between field practice and conservation, the analysis should lead to more effective integrated conservation and development interventions. The book represents one of the first attempts to apply the evidence-based approach to conservation and development.

From reader reviews:

Helen Turner:

The book Evidence-based Conservation: Lessons from the Lower Mekong (The Earthscan Forest Library) will bring someone to the new experience of reading some sort of book. The author style to clarify the idea is very unique. In case you try to find new book to read, this book very acceptable to you. The book Evidence-based Conservation: Lessons from the Lower Mekong (The Earthscan Forest Library) is much recommended to you you just read. You can also get the e-book through the official web site, so you can quickly to read the book.

Sarah Maddocks:

The reason why? Because this Evidence-based Conservation: Lessons from the Lower Mekong (The Earthscan Forest Library) is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will zap you with the secret that inside. Reading this book next to it was fantastic author who else write the book in such remarkable way makes the content inside easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you because of not hesitating having this anymore or you going to regret it. This unique book will give you a lot of positive aspects than the other book get such as help improving your skill and your critical thinking way. So , still want to hesitate having that book? If I had been you I will go to the book store hurriedly.

Sam Richey:

Beside that Evidence-based Conservation: Lessons from the Lower Mekong (The Earthscan Forest Library) in your phone, it could possibly give you a way to get more close to the new knowledge or info. The information and the knowledge you are going to got here is fresh from your oven so don't always be worry if you feel like an old people live in narrow town. It is good thing to have Evidence-based Conservation: Lessons from the Lower Mekong (The Earthscan Forest Library) because this book offers for you readable information. Do you often have book but you do not get what it's facts concerning. Oh come on, that will not end up to happen if you have this in your hand. The Enjoyable option here cannot be questionable, like treasuring beautiful island. Use you still want to miss the item? Find this book and also read it from now!

Sean Ward:

As a student exactly feel bored to reading. If their teacher asked them to go to the library as well as to make summary for some publication, they are complained. Just tiny students that has reading's spirit or real their passion. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that reading through is not important, boring and can't see colorful images on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Evidence-based Conservation: Lessons from the Lower Mekong (The

Earthscan Forest Library) can make you really feel more interested to read.
