Fixed Points: Algorithms and Applications

Fixed Points: Algorithms and Applications

Fixed Points: Algorithms and Applications
Fixed Points: Algorithms and Applications covers the proceedings of the First International Conference on Computing Fixed Points with Applications, held in the Department of Mathematical Sciences at Clemson University, Clemson, South Carolina on June 26-28, 1974.

This book is composed of 21 chapters and starts with reviews of finding roots of polynomials by pivoting procedures and the relations between convergence and labeling in approximation algorithm. The next chapters deal with the principles of complementary pivot theory and the Markovian decision chains; the method of continuation for Brouwer fixed point calculation; a fixed point approach to stability in cooperative games; and computation of fixed points in a nonconvex region. Other chapters discuss a computational comparison of fixed point algorithms, the fundamentals of union jack triangulations, and some aspects of Mann's iterative method for approximating fixed points. The final chapters consider the application of fixed point algorithms to the analysis of tax policies and the pricing for congestion in telephone networks.

This book will prove useful to mathematicians, computer scientists, and advance mathematics students.

From reader reviews:

Ebony Thornton:

Nowadays reading books be than want or need but also be a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge the rest of the information inside the book in which improve your knowledge and information. The data you get based on what kind of e-book you read, if you want have more knowledge just go with education and learning books but if you want experience happy read one having theme for entertaining for example comic or novel. Often the Fixed Points: Algorithms and Applications is kind of reserve which is giving the reader unforeseen experience.

Clarence Cobb:

This Fixed Points: Algorithms and Applications is great reserve for you because the content that is full of information for you who all always deal with world and have to make decision every minute. This kind of book reveal it data accurately using great plan word or we can point out no rambling sentences in it. So if you are read this hurriedly you can have whole facts in it. Doesn't mean it only provides straight forward sentences but challenging core information with beautiful delivering sentences. Having Fixed Points: Algorithms and Applications in your hand like obtaining the world in your arm, information in it is not ridiculous just one. We can say that no book that offer you world in ten or fifteen moment right but this guide already do that. So , this really is good reading book. Hello Mr. and Mrs. occupied do you still doubt that will?

In order to get information about your examine, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, in addition to soon. The Fixed Points: Algorithms and Applications provide you with a new experience in reading a book.

Nancy Brown:

Reserve is one of source of understanding. We can add our know-how from it. Not only for students but in addition native or citizen will need book to know the revise information of year in order to year. As we know those guides have many advantages. Beside all of us add our knowledge, also can bring us to around the world. By the book Fixed Points: Algorithms and Applications we can take more advantage. Don't someone to be creative people? Being creative person must like to read a book. Only choose the best book that acceptable with your aim. Don't end up being doubt to change your life by this book Fixed Points: Algorithms and Applications. You can more appealing than now.
