Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product Steven Shire

Monoclonal antibodies (MAbs) are currently the major class of protein bio therapeutic being developed by biotechnology and pharmaceutical companies. Monoclonal Antibodies discusses the challenges and issues revolving around development of a monoclonal antibody produced by recombinant DNA technology into a therapeutic agent. This book covers downstream processing which includes design of processes to manufacture the formulation, formulation design, fill and finish into closure systems and routes of administration. The characterization of the final drug product is covered where the use of biophysical methods combined with genetic engineering is used to understand the solution properties of the formulation. The latter has become very important since many indications such as arthritis and asthma require the development of formulations for subcutaneous delivery (SC). The development of formulations for IV delivery is also important and comes with a different set of challenges. The challenges and strategies that can overcome these limitations are discussed in this book, starting with an introduction to these issues, followed by chapters detailing strategies to deal with them. Subsequent chapters explore the processing and storage of mAbs, development of delivery device technologies and conclude with a chapter on the future of mAbs in therapeutic remedies.

- Discusses the challenges to develop MAbs for intravenous (IV) and subcutaneous delivery (SC)
- Presents strategies to meet the challenges in development of MAbs for SC and IV administration
- Discusses the use of biophysical analytical tools coupled with MAb engineering to understand what governs MAb properties at high concentration

From reader reviews:

Lenore Ryan:

The e-book with title Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product has lot of information that you can understand it. You can get a lot of profit after read this book. This specific book exist new knowledge the information that exist in this reserve represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This book will bring you within new era of the glowbal growth. You can read the e-book on the smart phone, so you can read that anywhere you want.

Jennifer Joseph:

Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product can be one of your basic books that are good idea. Most of us recommend that straight away because this e-book has good vocabulary which could increase your knowledge in vocab, easy to understand, bit entertaining but nonetheless delivering the information. The article writer giving his/her effort to place every word into enjoyment arrangement in writing Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product nevertheless doesn't forget the main position, giving the reader the hottest and also based confirm resource information that maybe you can be considered one of it. This great information can easily drawn you into brand new stage of crucial considering.

Erin Harmon:

Are you kind of hectic person, only have 10 or maybe 15 minute in your morning to upgrading your mind skill or thinking skill also analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your small amount of time to read it because all this time you only find reserve that need more time to be study. Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product can be your answer since it can be read by an individual who have those short free time problems.

Abigail Shelton:

That reserve can make you to feel relax. This book Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product was bright colored and of course has pictures around. As we know that book Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product has many kinds or category. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore not at all of book are make you bored, any it can make you feel happy, fun and relax. Try to choose the best book in your case and try to like reading in which.
