Policy-making to address grand challenges faces greater complexity than any previous project of modernization. Future scenarios are haunted by uncertainty and there is real ambivalence as to the values that policy should strive for. In this situation decision-makers look to research and innovation to provide answers and solutions. But neither can the great transitions ahead be planned by science, nor will conventional methods of innovation bring such transitions about. A turn to interactive governance is therefore underway with policy-makers and citizens becoming increasingly involved in processes of deliberating futures. Technology Assessment (TA) is the art of structuring such processes. TA goes beyond traditional expert policy analysis by systematically combining a multi-disciplinary evidence base with participatory approaches to policy deliberation. TA thus seeks to act as a hub for serious and transparent dialogue between policy, industry, science, and society about the challenges ahead and the available options for overcoming them responsibly. This volume offers an up-to-date account of the expansion of technology assessment capacities across new European member states. The contributions of this volume are written by leading European researchers and practitioners in technology assessment (TA) and are based on the PACITA (Parliaments and Civil Society in Technology Assessment) project.

From reader reviews:

Thomas Bedwell:

Information is provisions for people to get better life, information currently can get by anyone with everywhere. The information can be a understanding or any news even restricted. What people must be consider when those information which is inside former life are challenging be find than now is taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you get the unstable resource then you understand it as your main information there will be huge disadvantage for you. All those possibilities will not happen inside you if you take Policy-Oriented Technology Assessment Across Europe: Expanding Capacities as the daily resource information.

Richard Valadez:

Reading a guide tends to be new life style within this era globalization. With reading you can get a lot of information which will give you benefit in your life. With book everyone in this world could share their idea. Publications can also inspire a lot of people. A great deal of author can inspire their own reader with their story as well as their experience. Not only the storyline that share in the books. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on earth always try to improve their ability in writing, they also doing some study before they write on their book. One of them is this Policy-Oriented Technology Assessment Across Europe: Expanding Capacities.

Catherine Mejia:
