## Atlas of Nuclear Cardiology

The aim of the 4th edition of the Atlas of Nuclear Cardiology is to provide physicians and students in cardiology, radiology, and nuclear medicine who want the latest information in the field of cardiovascular nuclear medicine up-to-date and comprehensive information on advances in instrumentation, radiotracers, protocols, and clinical studies. Unlike other books that are narrow in their scope of either technology and technique or clinical studies, the 4th edition of the Atlas will present diagnostic algorithms and schematic diagrams integrated with nuclear cardiology procedures generously interspersed with color illustrations to emphasize key concepts in cardiovascular physiology, pathology, and metabolism relevant for the clinical practice of cardiology. The atlas emphasizes today's most current information, meeting the requirements for those who will be using the book as a reference source for certifying or re-certifying in cardiology, nuclear cardiology, nuclear medicine or radiology.

Hybrid PET/CT and SPECT/CT represent new technologies that were introduced recently in clinical medicine and are evolving rapidly with several improvements in instrumentation, imaging procedures as well as in clinical trials that support the expanded role of these technologies in clinical practice. As such, an updated 4th edition of the Atlas is critical in order for the clinicians remain current with the imaging field and maintain their skills. Imaging protocols with the

se technologies have to be updated and/or expanded in order to acquire high quality images at a reduced radiation burden to the patient while advancing the application of these techniques for more advanced disease detection. Accordingly, beyond significantly updating the chapters from the 3rd edition, 2 new chapters will be introduced in the 4th edition, which reflects the expanded clinical applications of the technologies in the past 3 years. The new chapters are as follows: "Hybrid SPECT/CT and PET/CT Imaging" and a dedicated chapter on "Radiation Safety and Exposure: Clinical Decision-Making and the Risk-Benefit Ratio". Chapter 7 from the 3rd edition will be deleted.

The updated Atlas will serve as a reference source for all cardiologists, radiologists, and nuclear medicine physicians interested in the most up-to-date approaches to noninvasive diagnostic cardiovascular nuclear imaging techniques for the evaluation of patients with known or suspected coronary artery disease as well as non-coronary heart disease. It will also serve as a ready reference textbook for medical students and residents interested in the practice of cardiovascular medicine.

### **From reader reviews:**

#### **Nadine Taylor:**

Now a day people who Living in the era where everything reachable by talk with the internet and the resources inside can be true or not call for people to be aware of each details they get. How individuals to be smart in obtaining any information nowadays? Of course the answer is reading a book. Looking at a book can help individuals out of this uncertainty Information mainly this Atlas of Nuclear Cardiology book as this book offers you rich data and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you know.

#### **Timothy Hardy:**

With this era which is the greater person or who has ability in doing something more are more treasured than other. Do you want to become considered one of it? It is just simple approach to have that. What you have to do is just spending your time very little but quite enough to have a look at some books. Among the books in the top list in your reading list is definitely Atlas of Nuclear Cardiology. This book that is certainly qualified as The Hungry Inclines can get you closer in growing to be precious person. By looking way up and review this book you can get many advantages.

#### **Arthur McLaurin:**

As we know that book is vital thing to add our know-how for everything. By a publication we can know everything we wish. A book is a range of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This book Atlas of Nuclear Cardiology was filled with regards to science. Spend your time to add your knowledge about your research competence. Some people has diverse feel when they reading the book. If you know how big selling point of a book, you can feel enjoy to read a reserve. In the modern era like currently, many ways to get book which you wanted.

#### **Ronnie Johnson:**

A number of people said that they feel fed up when they reading a reserve. They are directly felt that when they get a half elements of the book. You can choose the actual book Atlas of Nuclear Cardiology to make your current reading is interesting. Your own personal skill of reading skill is developing when you including reading. Try to choose straightforward book to make you enjoy to read it and mingle the feeling about book and examining especially. It is to be first opinion for you to like to open a book and study it. Beside that the book Atlas of Nuclear Cardiology can to be your brand new friend when you're really feel alone and confuse using what must you're doing of this time.
