## Evolutionary Ecology of Social and Sexual Systems: Crustaceans As Model Organisms

Understanding of animal social and sexual evolution has seen a renaissance in recent years with discoveries of frequent infidelity in apparently monogamous species, the importance of sperm competition, active female mate choice, and eusocial behavior in animals outside the traditional social insect groups. Each of these findings has raised new questions, and suggested new answers, about the evolution of behavioral interactions among animals. This volume synthesizes recent research on the sexual and social biology of the Crustacea, one of the dominant invertebrate groups on earth. Its staggering diversity includes ecologically important inhabitants of nearly every environment from deep-sea trenches, through headwater streams, to desert soils. The wide range of crustacean phenotypes and environments is accompanied by a comparable diversity of behavioral and social systems, including the elaborate courtship and wildly exaggerated morphologies of fiddler crabs, the mysterious queuing behavior of migrating spiny lobsters, and even eusociality in coral-reef shrimps. This diversity makes crustaceans particularly valuable for exploring the comparative evolution of sexual and social systems. Despite exciting recent advances, however, general recognition of the value of Crustacea as models has lagged behind that of the better studied insects and vertebrates. This book synthesizes the state of the field in crustacean behavior and sociobiology and places it in a conceptually based, comparative framework that will be valuable to active researchers and students in animal behavior, ecology, and evolutionary biology. It brings together a group of internationally recognized and rising experts in fields related to crustacean behavioral ecology, ranging from physiology and functional morphology, through mating and social behavior, to ecology and phylogeny. Each chapter makes connections to other, non-crustacean taxa, and the volume closes with a summary section that synthesizes the contributions, discusses anthropogenic impacts, highlights unanswered questions, and provides a vision for profitable future research.

### **From reader reviews:**

#### **Nicholas Gober:**

The e-book untitled Evolutionary Ecology of Social and Sexual Systems: Crustaceans As Model Organisms is the guide that recommended to you to read. You can see the quality of the e-book content that will be shown to you. The language that creator use to explained their way of doing something is easily to understand. The article writer was did a lot of research when write the book, therefore the information that they share to your account is absolutely accurate. You also might get the e-book of Evolutionary Ecology of Social and Sexual Systems: Crustaceans As Model Organisms from the publisher to make you much more enjoy free time.

#### **John Singletary:**

A lot of people always spent their free time to vacation or go to the outside with them friends and family or their friend. Are you aware? Many a lot of people spent they free time just watching TV, as well as playing video games all day long. In order to try to find a new activity honestly, that is look different you can read a book. It is really fun for you. If you enjoy the book you read you can spent the whole day to reading a e-book. The book Evolutionary Ecology of Social and Sexual Systems: Crustaceans As Model Organisms it is very good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. When you did not have enough space to create this book you can buy typically the e-book. You can m0ore effortlessly to read this book out of your smart phone. The price is not to cover but this book possesses high quality.

#### **Ophelia Ellis:**

That book can make you to feel relax. This kind of book Evolutionary Ecology of Social and Sexual Systems: Crustaceans As Model Organisms was multi-colored and of course has pictures on the website. As we know that book Evolutionary Ecology of Social and Sexual Systems: Crustaceans As Model Organisms has many kinds or style. Start from kids until teens. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore not at all of book are generally make you bored, any it offers you feel happy, fun and unwind. Try to choose the best book for you and try to like reading this.

#### **Carolyn Ziolkowski:**

A lot of book has printed but it differs. You can get it by internet on social media. You can choose the top book for you, science, amusing, novel, or whatever by searching from it. It is identified as of book Evolutionary Ecology of Social and Sexual Systems: Crustaceans As Model Organisms. You can contribute your knowledge by it. Without making the printed book, it may add your knowledge and make you actually happier to read. It is most crucial that, you must aware about reserve. It can bring you from one location to other place.
