Molecular Targets in Protein Misfolding and Neurodegenerative Disease

Pierfausto Seneci

Molecular Targets in Protein Misfolding and Neurodegenerative Disease Pierfausto Seneci

Aimed at "drug discoverers" – i.e. any scientist who is interested in neurodegenerative diseases in general, and in finding disease-modifying treatments in particular – the first edition of *Molecular Targets in Protein Misfolding and Neurodegenerative Disease* will contain both a detailed, discipline-specific coverage (paragraphs on medicinal chemistry, on clinical and preclinical characterization of compounds in development, on target identification and validation, on genetic factors influencing a pathology, etc.) and a drug discovery-oriented, overall evaluation of each target (validation, druggability, existing leads, etc.). Together these will satisfy the needs of various audiences, including *in vitro* biologists, pharmacologists, medicinal chemists, etc.

- Written to provide a comprehensive coverage of disease-modifying mechanisms and compounds against neurodegenerative diseases
- Provides a "drug discovery" application oriented perspective, evaluating targets and candidates for their overall therapeutic potential
- Provides discipline-specific chapters (medicinal chemistry, target validation, preclinical and clinical development)
- Provides an overview on a number of molecular mechanisms (e.g. phosphorylation, chaperon refolding, ubiquitination, autophagy, microtubule transportation, protease cleavage, etc.) with relevance for any disease area
- Contains a more thorough description of the therapeutic relevance of ~10 specific molecular targets

From reader reviews:

Quincy Eddy:

The book Molecular Targets in Protein Misfolding and Neurodegenerative Disease can give more knowledge and also the precise product information about everything you want. So why must we leave the good thing like a book Molecular Targets in Protein Misfolding and Neurodegenerative Disease? Wide variety you have a different opinion about reserve. But one aim that book can give many info for us. It is absolutely right. Right now, try to closer with your book. Knowledge or data that you take for that, it is possible to give for each other; it is possible to share all of these. Book Molecular Targets in Protein Misfolding and Neurodegenerative Disease has simple shape but you know: it has great and large function for you. You can appearance the enormous world by open and read a guide. So it is very wonderful.

Roy Christy:

Information is provisions for those to get better life, information today can get by anyone in everywhere. The information can be a know-how or any news even a concern. What people must be consider whenever those information which is in the former life are challenging be find than now is taking seriously which one works to believe or which one the particular resource are convinced. If you get the unstable resource then you get it as your main information we will see huge disadvantage for you. All those possibilities will not happen in you if you take Molecular Targets in Protein Misfolding and Neurodegenerative Disease as your daily resource information.

Elizabeth Rodrigues:

Your reading 6th sense will not betray anyone, why because this Molecular Targets in Protein Misfolding and Neurodegenerative Disease book written by well-known writer we are excited for well how to make book that may be understand by anyone who have read the book. Written in good manner for you, leaking every ideas and publishing skill only for eliminate your own hunger then you still question Molecular Targets in Protein Misfolding and Neurodegenerative Disease as good book not merely by the cover but also through the content. This is one guide that can break don't assess book by its deal with, so do you still needing yet another sixth sense to pick this specific!? Oh come on your reading through sixth sense already alerted you so why you have to listening to a different sixth sense.

Gary Copeland:

A lot of e-book has printed but it differs from the others. You can get it by world wide web on social media. You can choose the top book for you, science, comedy, novel, or whatever by means of searching from it. It is called of book Molecular Targets in Protein Misfolding and Neurodegenerative Disease. Contain your knowledge by it. Without leaving behind the printed book, it could add your knowledge and make anyone happier to read. It is most important that, you must aware about reserve. It can bring you from one destination to other place.
