Air Pollution Control Equipment Calculations Louis Theodore

Unique problem-and-solution approach for quickly mastering a broad range of calculations

This book's problem-and-solution approach enables readers to quickly grasp the fundamentals of air pollution control equipment and essential applications. Moreover, the author sets forth solid principles for the design and selection of air pollution control equipment as well as for its efficient operation and maintenance. Readers gain a deep understanding of both the equipment itself and the many factors affecting performance.

Following two introductory chapters, the book dedicates four chapters to examining control equipment for gaseous pollutants, including adsorption, absorption, and incineration equipment. The remaining six chapters deal with equipment for managing airborne particulate pollutants, including gravity settlers, cyclones, electrostatic precipitators, scrubbers, and baghouses. The appendix contains discussions of hybrid systems, the SI system (including conversion constants), and a cost-equipment model.

Each chapter offers a short introduction to the control device discussed. Next, progressively more difficult problems with accompanying solutions enable readers to build their knowledge as they advance through the chapter. Problems reflect the most recent developments in pollution control and include a variety of performance equations and operation and maintenance calculations. Each problem includes a statement of the problem, the data used to solve the problem, and a detailed solution. Readers may further hone their skills by visiting the text's Web site for additional problems and solutions.

This publication serves both as a textbook for engineering students and as a reference for engineers and technicians who need to ensure that air pollution control equipment operates efficiently and enables their facility to meet all air pollution control standards and regulations.

From reader reviews:

Steven Page:

Have you spare time for any day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a move, shopping, or went to often the Mall. How about open or maybe read a book called Air Pollution Control Equipment Calculations? Maybe it is to get best activity for you. You know beside you can spend your time with your favorite's book, you can more intelligent than before. Do you agree with it has the opinion or you have various other opinion?

Bert Martinez:

The particular book Air Pollution Control Equipment Calculations will bring you to the new experience of reading a new book. The author style to spell out the idea is very unique. When you try to find new book you just read, this book very ideal to you. The book Air Pollution Control Equipment Calculations is much recommended to you to learn. You can also get the e-book from the official web site, so you can quickly to read the book.

Rana Jensen:

Do you have something that you like such as book? The publication lovers usually prefer to pick book like comic, short story and the biggest an example may be novel. Now, why not striving Air Pollution Control Equipment Calculations that give your pleasure preference will be satisfied through reading this book. Reading practice all over the world can be said as the means for people to know world much better then how they react to the world. It can't be said constantly that reading behavior only for the geeky man or woman but for all of you who wants to be success person. So , for all of you who want to start reading as your good habit, it is possible to pick Air Pollution Control Equipment Calculations become your current starter.

Maria Levine:

Many people said that they feel bored when they reading a e-book. They are directly felt it when they get a half regions of the book. You can choose typically the book Air Pollution Control Equipment Calculations to make your personal reading is interesting. Your current skill of reading talent is developing when you including reading. Try to choose basic book to make you enjoy to read it and mingle the feeling about book and examining especially. It is to be 1st opinion for you to like to available a book and go through it. Beside that the guide Air Pollution Control Equipment Calculations can to be your new friend when you're experience alone and confuse in what must you're doing of these time.
