Methods of Non- α -Amino Acid Synthesis, Second Edition Michael Bryant Smith

Although less common than α -amino acids, non- α -amino acids—where the amino group is not on the carbon immediately adjacent to the carboxyl group but is attached to another carbon in the chain (for example, the β , γ , δ carbon)—are components of biologically important molecules, are significant in the pharmaceutical industry, and are useful starting materials for many areas of organic chemistry. Since the publication of the first edition of this book nearly 20 years ago, synthetic work devoted to the preparation of non- α -amino acids has expanded greatly.

Methods of Non- α -Amino Acid Synthesis, Second Edition has been extensively rewritten and reorganized, providing an up-to-date review of strategies and methods for non- α -amino acid synthesis, particularly those amino acids that are key synthetic intermediates or important compounds in their own right. It focuses on acyclic amino acids of C₃–C₁₀, but also aminoalkanoic carboxylic acids, aminoalkenoic acids, and aminoalkynoic acids. The new edition contains many updated references and has a greater emphasis on the biological importance of non- α -amino acids. In addition to an array of synthetic methods, the book offers discussions on why non- α -amino acids are important.

The book covers synthetic methods that rely on substituent refunctionalization, the conversion of cyclic precursors to acyclic amino acids, conjugate addition reactions, and enolate anion reactions and condensation reactions that lead to non- α -amino acids. It also examines reactions and strategies that lead to good diastereoselectivity and enantioselectivity during synthesis. A chapter devoted to biologically important amino acids includes separate sections on GABA, GABOB, carnitine, DAVA, statine, and other significant amino acids as well as a new section on peptides and proteins that contain non- α -amino acids. The final chapter addresses aminocyclic and heterocyclic amino acids.

From reader reviews:

Lavone Anderson:

Have you spare time for any day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a walk, shopping, or went to the Mall. How about open as well as read a book titled Methods of Non- α -Amino Acid Synthesis, Second Edition? Maybe it is for being best activity for you. You already know beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have other opinion?

Bryan Perry:

Now a day those who Living in the era just where everything reachable by connect with the internet and the resources within it can be true or not call for people to be aware of each data they get. How a lot more to be smart in acquiring any information nowadays? Of course the answer is reading a book. Examining a book can help persons out of this uncertainty Information particularly this Methods of Non- α -Amino Acid Synthesis, Second Edition book since this book offers you rich details and knowledge. Of course the details in this book hundred per cent guarantees there is no doubt in it as you know.

Edwina Hinkle:

A lot of people always spent all their free time to vacation or go to the outside with them family or their friend. Did you know? Many a lot of people spent these people free time just watching TV, or playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read a new book. It is really fun for yourself. If you enjoy the book that you just read you can spent the entire day to reading a guide. The book Methods of Non- α -Amino Acid Synthesis, Second Edition it is quite good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. Should you did not have enough space to create this book you can buy often the e-book. You can m0ore very easily to read this book through your smart phone. The price is not very costly but this book offers high quality.

Helen Chandler:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information from your book. Book is published or printed or illustrated from each source which filled update of news. In this particular modern era like now, many ways to get information are available for anyone. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just trying to find the Methods of Non- α -Amino Acid Synthesis, Second Edition when you desired it?
