Structures and Architecture: New concepts, applications and challenges

Structures and Architecture: New concepts, applications and challenges

Although the disciplines of **architecture and structural engineering** have both experienced their own historical development, their interaction has resulted in many fascinating and delightful structures. To take this interaction to a higher level, there is a need to stimulate the inventive and creative design of architectural structures and to persuade architects and structural engineers to further collaborate in this process, exploiting together **new concepts, applications and challenges**.

The **Structures and Architecture** set of book of abstracts (704pp) and full paper searchable CD-ROM (2262pp) presents over 300 selected papers presented at the 2nd International Conference on Structures and Architecture Conference (ICSA2013), organized by the School of Architecture of the University of Minho, Guimarães, Portugal (July 2013), to promote the synergy in the collaboration between the disciplines of architecture and structural engineering.

The set addresses all major aspects of structures and architecture, including building envelopes, comprehension of complex forms, computer and experimental methods, concrete and masonry structures, educating architects and structural engineers, emerging technologies, glass structures, innovative architectural and structural design, lightweight and membrane structures, special structures, steel and composite structures, the borderline between architecture and structural engineering, the history of the relationship between architects and structural engineers, the tectonics of architectural solutions, the use of new materials, timber structures and more.

The contributions on creative and scientific aspects of the conception and construction of structures, on advanced technologies and on complex architectural and structural applications represent a **fine blend of scientific, technical and practical novelties** in both fields.

This set is intended for both **researchers and practitioners**, including architects, structural and construction engineers, builders and building consultants, constructors, material suppliers and product manufacturers, and other experts and professionals involved in the design and realization of architectural, structural and infrastructural projects.

From reader reviews:

Scott Barbour:

Reading a reserve can be one of a lot of task that everyone in the world enjoys. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new info. When you read a e-book you will get new information mainly because book is one of a number of ways to share the information or their idea. Second, studying a book will make an individual more imaginative. When you studying a book especially fictional works book the author will bring someone to imagine the story how the figures do it anything. Third, it is possible to share your knowledge to other folks. When you read this Structures and Architecture: New concepts, applications and challenges, it is possible to tells your family, friends as well as soon about yours guide. Your knowledge can inspire different ones, make them reading a guide.

Daniel Carter:

The reserve with title Structures and Architecture: New concepts, applications and challenges contains a lot of information that you can study it. You can get a lot of advantage after read this book. This particular book exist new know-how the information that exist in this publication represented the condition of the world now. That is important to yo7u to find out how the improvement of the world. This book will bring you in new era of the globalization. You can read the e-book with your smart phone, so you can read it anywhere you want.

Charles Adams:

The book Structures and Architecture: New concepts, applications and challenges has a lot of information on it. So when you make sure to read this book you can get a lot of profit. The book was published by the very famous author. Tom makes some research just before write this book. This specific book very easy to read you may get the point easily after perusing this book.

Tammie Jackson:

People live in this new moment of lifestyle always make an effort to and must have the extra time or they will get large amount of stress from both daily life and work. So , once we ask do people have time, we will say absolutely of course. People is human not a robot. Then we request again, what kind of activity do you possess when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you try this one, reading ebooks. It can be your alternative with spending your spare time, often the book you have read will be Structures and Architecture: New concepts, applications and challenges.
