Matthew Kelley, Doris Wu, Richard R. Fay

Development of the Inner Ear: 26 (Springer Handbook of Auditory Research) Matthew Kelley, Doris Wu, Richard R. Fay

This book describes the embryonic development of the vertebrate inner ear in six chapters that span all aspects of inner ear development, from the induction of the otic placode through cellular morphogenesis, to the onset of auditory function. In each chapter, a particular aspect of development of the inner ear is examined in terms of both classic embryologic experiments and more recent advances using molecular biological techniques.
