Clinical Neurophysiology in Pediatrics: A Practical Approach to Neurodiagnostic Testing and Management

Gloria M. Galloway

Clinical Neurophysiology in Pediatrics: A Practical Approach to Neurodiagnostic Testing and Management Gloria M. Galloway

This is the first book to comprehensively address neurodiagnostic testing for the broad scope of clinical neurophysiologic disorders in the pediatric population. The field of clinical neurophysiology has expanded exponentially with the development of new approaches, techniques, studies, and certifications. This book bridges the gap in clinical information available for practitioners who use neurophysiologic techniques to evaluate and treat children and adolescents with epilepsy, sleep, neuromuscular, and autonomic disorders but may not have subspecialty training in each individual field.

Drawing on the expertise and clinical wisdom of leading practitioners and researchers in each area of clinical neurophysiology, the book focuses on the technical and interpretive skills unique to treating the pediatric population. It covers the full spectrum of neurophysiologic topics including pediatric sleep disorders, epilepsy, febrile seizures and nonepileptic paroxysmal disorders. Chapters address pediatric muscular dystrophies, EMG, brachial plexopathies, peripheral neuropathy, intraoperative monitoring, evoked potentials, evaluation of autonomic disorders, and EMG studies for all applications. This singular working reference will be indispensable for the clinical provider as well as for trainees and technologists who use a wide diversity of clinical neurophysiologic skills to more accurately diagnose and treat neurologic disorders in children and adolescents.

Key Features:

- Delivers comprehensive information on all areas of pediatric clinical neurophysiology
- Provides clinical and procedural guidance for performing and interpreting neurodiagnostic tests in children and adolescents
- Over 100 illustrations of studies and findings amplify the text
- Brings together experts from the fields of epilepsy, sleep, neuromuscular and autonomic disorders, and neurophysiological monitoring

About the Editor:

Gloria M. Galloway, MD, FAAN is Professor of Clinical Neurology, Ohio State University Medical Center, Columbus, OH
